

Open the file in any text editor and scroll to the **API CONFIGURATION** block (around line 594). You'll find all three providers ready to go:

To switch to OpenAI:

1. Comment out the entire Option A block (add // at the start of each line)
2. Uncomment Option B (remove the // from each line)
3. Replace sk-proj-YOUR_KEY_HERE with your real key
4. Optionally change the model (gpt-4o, gpt-4o-mini, gpt-4-turbo)

To switch to Gemini:

1. Comment out Option A
2. Uncomment Option C
3. Replace AlzaYOUR_KEY_HERE with your real key
4. Optionally change the model (gemini-1.5-pro, gemini-1.5-flash, gemini-2.0-flash)
